8.

To build/setUp new kernel

sudo apt-get update

#get the linux kernel tar ball from the follwing URL with wgets

echo $'\n Getting the Linux Kernel and Untaring \n'
wget https://cdn.kernel.org/pub/linux/kernel/v4.x/linux-4.14.13.tar.xz

Untar-ing the kernel
tar -xf linux-4.14.13.tar.xz

change directory to linux kernel
cd linux-4.14.13

Configure the linux kernel
echo $'\nConfiguring Linux Kernel\n'
cp /boot/config-$(uname -r) .config

a GUI pops up - which needs to be configured manually - its doing the same cp config command in GUI form

make menuconfig

echo $'\nbuilding Kernel.\n'

Build the kernel

make -j 2

echo $'\nInstalling kernel modules\n'

Install the kernel modules

make -j 2 modules_install

echo $'\nInstalling kernel\n'

Copy kernel and .config file to /boot folder to generate system.map

make -j 2 install

echo $'\nKernel install done..few more steps\n'

to use new kernel after the next boot up

update-initramfs -c -k linux-4.14.13

for the GRUB to automatically look for the available kernels in /boot folder

update-grub

update-grub2

echo $'\nKernel install done.\n'

To have this execute in the command line to a log file type :

./my_build_kernel > build.log2
